195 ACRES OF THE GREATEST THE GREAT OUTDOORS CAN PROVIDE.

Research has shown that the colour green can help boost creativity¹ and that being surrounded by plants and nature can reduce stress².

This innovative thinking was a key inspiration for Green Park, set within 195 acres of sensitively landscaped space.

Our parkland setting has been planned and nurtured over the last 26 years to encourage biodiversity, with planting and landscaping carefully considered to create a sustainable and beautiful environment that's nourishing for body and soul.
